Scientific Research	" An Analytical Study of the Factors Affecting Overcoming Disasters Effects", Master thesis- study about Reconstruction Technologies after disasters using local technologies and materials, Science and Building Technology, Faculty of Engineering- Architectural Engineering, Cairo University, Giza-Egypt.	2010: Oct. 4th
	" An Approach to Control Cost Overruns in Construction Projects of Egypt (Special Reference to Administrative Buildings), PhD thesis- study about Problem of cost overrun in Egypt that causes failure of projects. Factors influencing construction project cost are varied. This problem contributed to large proportions in making many problems. This research identifies the most critical factors that leading to cost overruns in construction projects in Egypt, mainly in administrative buildings. Furthermore, provides an approach to control cost overrun problem in construction projects an proposes a response to the cost overrun framework by having many suggestions to minimize the impacts of cost overruns in the construction industry, Science and Building Technology, Faculty of Engineering- Architectural Engineering, Cairo University, Giza- Egypt.	2013: December 1st
